1. The first part of the report is a general description of the project and its objectives. It includes a brief history of the project and a statement of the problem to be solved.

2. The second part of the report is a detailed description of the methodology used in the study. It includes a description of the data collection methods and the statistical analysis techniques used.

3. The third part of the report is a discussion of the results of the study. It includes a comparison of the results with the objectives of the project and a discussion of the implications of the findings.

4. The fourth part of the report is a conclusion and a list of references. The conclusion summarizes the main findings of the study and the references list the sources of information used in the study.

5. The fifth part of the report is a list of appendices. The appendices contain supplementary material that is too large to include in the main body of the report.

6. The sixth part of the report is a list of figures and tables. The figures and tables are used to present the results of the study in a clear and concise manner.

7. The seventh part of the report is a list of abbreviations. The abbreviations are used to simplify the text and to make it easier to read.

8. The eighth part of the report is a list of symbols. The symbols are used to represent mathematical concepts and to make the text more concise.

9. The ninth part of the report is a list of footnotes. The footnotes are used to provide additional information about the study and to cite sources of information.

10. The tenth part of the report is a list of references. The references are used to cite the sources of information used in the study.
